DETAILED ACTION

Drawings

Applicant's arguments on page 10 of the Amendment of April 24, 2003, with respect to Figure 1 and the legend "PRIOR ART" are persuasive, therefore changes to Figure 1 are no longer required.

Newly submitted Figure 14, is approved.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 22, the phrase "light rays entering at the edge of the disc" requires further points of reference to make clear the direction from which light enters the edge of the disc and how the edge of the disc is defined. For example, one can interpret "the edge of the disc" to be the outer edge of the disc defined by a set of points found in a different plane from that defined by either face of the disc, or "the edge of the disc" can be interpreted as being defined by points around the outer edge of the disc in the same plane as either face of the disc.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 22 is rejected under 35 U.S.C. 102(a) as being anticipated by Vaissie et al.

Claim 22 as amended sets forth: A monocentric lens comprising a generally circular transparent disc whose thickness varies with radius (circular symmetric lens 1), and adapted to receive and collimate light rays entering at the edge of the disc.

As far as the terms and limitations of claim 22 can be understood, any light rays received by circular symmetric lens 1 would be collimated. Claim 22 does not specify a light source or the direction light is emitted from a source with respect to the disc, therefore Vaissie et al. still reads on claim 22.

Response to Arguments

Applicant's arguments filed April 23, 2003 have been fully considered but they are not persuasive with respect to claim 22. The examiner is not equating thickness and radius in the manner that applicant seems to suggest. With respect to claim 22, the circular symmetric lens 1 clearly meets the language "a generally circular transparent disc whose thickness varies with radius" as the radius can be measured at a variety of points in a plane perpendicular to the plane defining the thickness of said disc.

Allowable Subject Matter

Claims 1-21 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Maruyama U.S. Patent 6,480,344 B1 teaches an objective lens for optical pick-up.

Carter Patent Application Publication US 2001/0028434 A1 teaches a bifocal contact lens.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
